Blockchain & DLT Landscape & Gaps Analysis

Through our Blockchain landscape page you will be able to dive deep into:

· The main organisations and initiatives dealing with standardisation, which collectively work to avoid contradictory content and unnecessary costs for standard makers, users and end-consumers

· A Breakdown of published, emerging and transversal standards on Blockchain

· A list of priority areas in the blockchain standardisation sector

Learn about Standardisation organisations and trends in the Blockchain area

COMPSAC 2024

SEEBLOCKS.eu is flying to Osaka (Japan) in July and some of you are coming with us!

SEEBLOCKS.eu is participating in the COMPSAC 2024 event entitled "Digital Development for a better future".

Together with a number of selected experts that submitted their papers, we are organising the "Blockchain Nexus: Bridging Innovations and Standards for Tomorrow's Digital Frontier" Workshop, which will be focused on the importance of standardisation in creating a common framework and fostering innovation.

3rd Selection and Engagement Procedure is Open!

Are you an expert in Blockchain and DLT Standardisation and would like to get funded for your idea?

The SEEBLOCKS.eu is providing €300,000 in funding - through four Selection and Engagement Procedures (SEPs) - to European experts on Blockchain/DLT Standardisation in European, international and global Standard Development Organisations to represent Europe's interests in Blockchain standardisation.

Our third SEP will be open until June 7th, each winning proposal can win up to €10.000 after being selected by a committee of experts that will carefully review each submission.

Apply till June 7th! Gain international visibility & have your expertise recognised

Would you like to get involved?

We are looking for experts and innovators in the Blockchain / DLT Standardisation area. We organise online and physical events and we're always hunting for blockchain papers and proposals. Reach out to us and be our guest!

Blockchain Standardisation Open Consultation Report

As technology increasingly impacts society, it becomes more and more important to bridge Policymaking and technology innovators

SEEBLOCKS.eu organised its first public consultation to gather insights on perceptions and needs from both technology and non-technology stakeholders concerning technological and societal needs.

The contributions will be implemented in the development of the "Landscape and Gap Analysis Report on Blockchain/DLT Standardisation," which will be proposed to the European Commission contributing to the Blockchain Chapter within the Rolling Plan for ICT Standardisation.

Learn more about the results our first Public consultation!

Discover the Standard Visualisation Tool

Want to learn more about the Standardisation landscape?

Check out our Standard Visualisation tool and dive into different publications fostering education and capacity building in Europe, within Blockchain & DLT Standardisation domain, but also ICT standardisation in general.

Slides, Books, articles, papers and videos are freely available to everyone!

The tool supports future navigation around Blockchain & DLT standardisation. Empower yourself by exploring our diverse and growing range of materials!
