Blockchain & DLT Landscape & Gaps Analysis

Through our Blockchain landscape page you will be able to dive deep into:

- The main organisations and initiatives dealing with standardisation, which collectively work to avoid contradictory content and unnecessary costs for standard makers, users and end-consumers
- A Breakdown of published, emerging and transversal standards on Blockchain
- A list of priority areas in the blockchain standardisation sector

Learn about Standardisation organisations and trends in the Blockchain area

EU-funded Projects Driving Standardisation in Europe

Financial support for standardisation experts

Grants for ICT Standards Experts since 2018

- Grants for ICT experts in EU and international standardisation
- Delivery of the ICT Standards Training Academy
- Management of the EU ICT Standards Observatory

Supporting Standards for the Cyber Resilience Act

- Financial support for cybersecurity standardisation experts
- Development of standards the EU Cyber Resilience Act
- Activation of Working Groups, consultations and events

International Cooperation

International Cooperation on Standards and Policy for Digital

- Awareness of EU ICT/digital standards for key technologies
- International cooperation on standards, policies & regulations
- Open calls for international cooperation capacity building

Shaping international standards for advanced technologies

- Support to EU Digital Partnerships and EU-US Trade and Technology Council meetings
- Dialogue with Australia, Canada, Japan, Singapore, South Korea, Taiwan & USA
- Standardisation Roadmaps: 5G/6G; AI; Cybersecurity/eID; Data; IoT/Edge/Cloud & Internet and Quantum

Expertise and Education

Boosting Standardisation in R&I projects

- Delivery of expert mentoring services to EU R&I projects
- Financial support to multi-domain standardisation mentors
- Establishment of a Standards Training Academy for researchers

Standardisation Teaching for EU Higher Education

- Innovation of teaching standardisation in Higher Education
- Delivery of 5 Standardisation teaching pilots across Europe
- Creation of an EU Standardisation Student Association

COMPSAC 2024

Join us during COMPSAC 2024 for our workshop in July 3rd, 03:30-05:00 PM!

SEEBLOCKS.eu is participating in the COMPSAC 2024 event entitled "Digital Development for a better future".

Together with a number of selected experts that submitted their papers, **SEEBLOCKS.eu is organising the "Blockchain Nexus: Bridging Innovations and Standards for Tomorrow's Digital Frontier" Workshop on July 3rd between 03:30 PM and 05:00 PM.**

The workshop brings together researchers from academia and industry to discuss developments, challenges, and best practices in Blockchain and DLT standardisation, aiming to bridge the gap between innovation and standardisation.

Learn more about the event and join us for our workshop!

The final Selection and Engagement Procedure is Open!

Are you an expert in Blockchain and DLT Standardisation and would like to get funded for your idea?

The SEEBLOCKS.eu is providing €300,000 in funding - through **four Selection and Engagement Procedures (SEPs)** to experts on Blockchain and DLT Standardisation that are residing in European Union Member States or Associated Countries. Selected experts should represent Europe's interests in Blockchain Standardisation within European, International and Global Standard Development Organisations.

Our fourth and final SEP will be open until July 22nd each winning proposal can win up to €10.000 after being selected by a committee of experts that will carefully review each submission.

Apply until July 22nd! Gain international visibility & have your expertise recognised

Blockchain Standardisation Open Consultation Report

As technology increasingly impacts society, it becomes more and more important to bridge Policymaking and technology innovators

SEEBLOCKS.eu organised its first **public consultation to gather insights** on perceptions and needs from both technology and non-technology stakeholders concerning technological and societal needs.

The contributions will be implemented in the development of the "Landscape and Gap Analysis Report on Blockchain/DLT Standardisation," which will be **proposed to the European Commission** contributing to the **Blockchain Chapter within the Rolling Plan for ICT Standardisation.**

Learn more about the results our first Public consultation!

The 2nd Open Consultation just launched! Complete the Survey!

We welcome COMPSAC 2024 participants to share their views on future worldwide Blockchain/DLT Standardisation priorities across different areas. The results will be available by end 2024.

Discover the Standard Visualisation Tool

Want to learn more about the Standardisation landscape?

Check out our Standard Visualisation tool and dive into different publications fostering education and capacity building in Europe, within Blockchain & DLT Standardisation domain, but also ICT standardisation in general.

Slides, Books, articles, papers and videos are freely available to everyone!

The tool supports future navigation around Blockchain & DLT standardisation. Empower yourself by exploring our diverse and growing range of materials!
