

# Call for Blockchain and DLT Use Cases

**SEEBLOCKS.eu is collecting Blockchain and Distributed Ledger Technologies (DLT) use cases across different business sectors, which will be considered for inclusion not only in the standard “ISO24878 New and emerging DLT/blockchain use cases” under development, but also in emerging blockchain standards.**

Use cases are the lifeblood of blockchain and DLT. Together with standardisation, they foster a virtuous cycle of innovation in this space. A good use case will also reveal areas in which standardisation is required to realise the full potential of its innovative features.

We welcome use cases that from wide range of sectors: medicine; finance; emergency private aid toward individuals, amongst others. Your floor is yours!

**Submit your own use case summary here and give it visibility to our growing community!**

# Blockchain & DLT Landscape & Gaps Analysis

Through our Blockchain landscape page you will be able to dive deep into:

- **The main organisations and initiatives dealing with standardisation, which collectively work to avoid contradictory content and unnecessary costs for standard makers, users and end-consumers**
- **A breakdown of published, emerging and transversal standards on blockchain**
- **A list of priority areas in the blockchain standardisation sector**

**Learn about Standardisation organisations and trends in the Blockchain area!**

# Discover the Standard Visualisation Tool

## Want to learn more about the Standardisation landscape?

Check out our Standard Visualisation Tool and dive into different publications fostering education and capacity building in Europe, within Blockchain & DLT Standardisation domain, but also ICT standardisation in general.

## Slides, books, articles, papers and videos are freely available to everyone!

The tool supports future navigation around Blockchain & DLT standardisation. Empower yourself by exploring our diverse and growing range of materials!

Visit the SEEBLOCKS.eu Standards Visualisation Tool and suggest new resources!

# The 4 Selection and Engagement Procedures are closed

SEEBLOCKS.eu provided to blockchain experts a total of **€300,000** funding **32 proposals** (29 were long-term and 3 short term) which came from different European countries and tackled topics like **Cybersecurity, Identity Management, Governance, Process Optimisation** and many more. Experts are involved in the work of various SDOs, namely:

The series of SEPs is over but the events are not, so join us for our upcoming Webinar on November 7th, presenting the work of some SEEBLOCKS.eu selected experts!

Register to our webinar: Blockchain & DLT as game changer for sustainability and a better future

# Would you like to get involved?

We are looking for experts and innovators in the Blockchain / DLT Standardisation area. We organise online and physical events and we're always hunting for blockchain papers and proposals. **Reach out to us and be our guest!**
