# Call for Blockchain & DLT Use Cases: show your story and shape blockchain standardisation efforts

**Submit your Use Case and give it visibility through our growing community!**
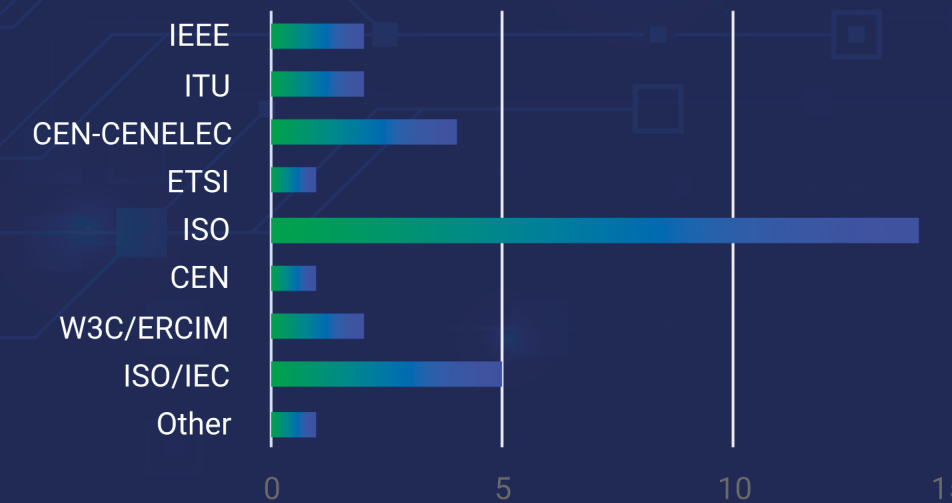

SEEBLOCKS.eu is collecting innovative Blockchain and DLT Use-Cases from various business sectors. These use cases will contribute to the development of the **"ISO24878 New and Emmerging DLT/ Blockchain Use Cases"** standard and other **emerging blockchain standards**.

**Submit your Use case and shape future Blockchain standardisation efforts!**

# SEEBLOCKS.eu effort in funding experts in Blockchain and DLT Standardisation

SEEBLOCKS.eu provided a total of **€300,000** funding **32 proposals** (**29** were long-term and **3** short term) which came from different European countries and tackled topics like **Cybersecurity, Identity Management, Governance, Process Optimisation** and many more. Representatives from different SDOs participated, most of them coming from:

Chart categories (top to bottom): IEEE, ITU, CEN-CENELEC, ETSI, ISO, CEN, W3C/ERCIM, ISO/IEC, Other. X-axis: 0, 5, 10, 15.

**The series of SEPs is over but the events are not, so join us for our upcoming Impact Event on April 10th in Brussels, Belgium. More info in the flyer!**

**Discover our experts here!**

# Blockchain & DLT Landscape & Gaps Analysis

Through our Blockchain landscape page you will be able to dive deep into:

· The main organisations and initiatives dealing with standardisation, which collectively work to avoid contradictory content and unnecessary costs for standard makers, users and end-consumers

· A Breakdown of published, emerging and transversal standards on Blockchain

· A list of priority areas in the blockchain standardisation sector

**Learn about Standardisation organisations and trends in the Blockchain area**

# Discover the Standard Visualisation Tool

**Want to learn more about the Standardisation landscape?**

Check out our Standard Visualisation Tool and dive into different publications fostering education and capacity building in Europe, within Blockchain & DLT Standardisation domain, but also ICT standardisation in general.

**Slides, books, articles, papers and videos are freely available to everyone!**

The tool supports future navigation around Blockchain & DLT standardisation. Empower yourself by exploring our diverse and growing range of materials!

**Visit the SEEBLOCKS.eu Standard Visualisation Tool, submit your material and get published!**

## Training Academy

SEEBLOCKS.eu offers a free of charge blockchain/ DLT standardisation courseware designed for learners at three levels: **basic**, **intermediate**, and **advanced**. The training includes video tutorials, lecture podcasts, textbooks, and structured learning materials.

The course covers **fundamental ICT standards**, the role of **blockchain** in **interoperability**, and the connection between **research and standardisation.**

Participants gain practical insights into blockchain policies and regulatory frameworks, and upon completion, receive an official **certification**, reinforcing their expertise and career prospects in the field.

**Check out the course and get your Blockchain certification!**

# EU-funded Projects Driving Standardisation in Europe

## Financial support for standardisation experts

**standICT.eu 2026**
standict.eu

**Grants for ICT Standards Experts since 2018**
- Grants for ICT experts in EU and international standardisation
- Delivery of the ICT Standards Training Academy
- Management of the EU ICT Standards Observatory

**CYBERSTAND.eu**
cyberstand.eu

**Supporting Standards for the Cyber Resilience Act**
- Financial support for cybersecurity standardisation experts
- Development of standards the EU Cyber Reslience Act
- Activation of Working Groups, consultations and events

**BLOCKSTAND**
blockstand.eu

**BLOCKSTAND - Grants for Blockchain Standards Experts**
- Grants for Blockchain Standards Experts
- Support the implementation of the European Commission's Rolling Plan for ICT Standardisation
- Reinforce links with the EBP and the EBSI

## International Cooperation

**indico GLOBAL**
indico-global.eu

**International Cooperation on Standards and Policy for Digital**
- Awareness of EU ICT/digital standards for key technologies
- International cooperation on standards, policies & regulations
- Open calls for international cooperation capacity building

**INSTAR**
instarstandards.org

**Shaping international standards for advanced technologies**
- Support to EU Digital Partnerships and EU-US Trade and Technology Council meetings
- Dialogue with Australia, Canada, Japan, Singapore, South Korea, Taiwan & USA
- Standardisation Roadmaps: 5G/6G; AI; Cybersecurity/eID; Data; IoT/Edge/Cloud & Internet and Quantum

## Expertise and Education

**HSbooster.eu**
Horizon Standardisation Booster
hsbooster.eu

**Boosting Standardisation in R&I projects**
- Delivery of expert mentoring services to EU R&I projects
- Financial support to multi-domain standardisation mentors
- Establishment of a Standards Training Academy for researchers

**EDU4Standards.eu**
edu4standards.eu

**Standardisation Teaching for EU Higher Education**
- Innovation of teaching standardisation in Higher Education
- Delivery of 5 Standardisation teaching pilots across Europe
- Creation of an EU Standardisation Student Association
